

***2004 Aerial Video Imaging Survey,  
Southeast Alaska  
(3-7th, June 2004)***

Prepared for the National Marine Fisheries Service

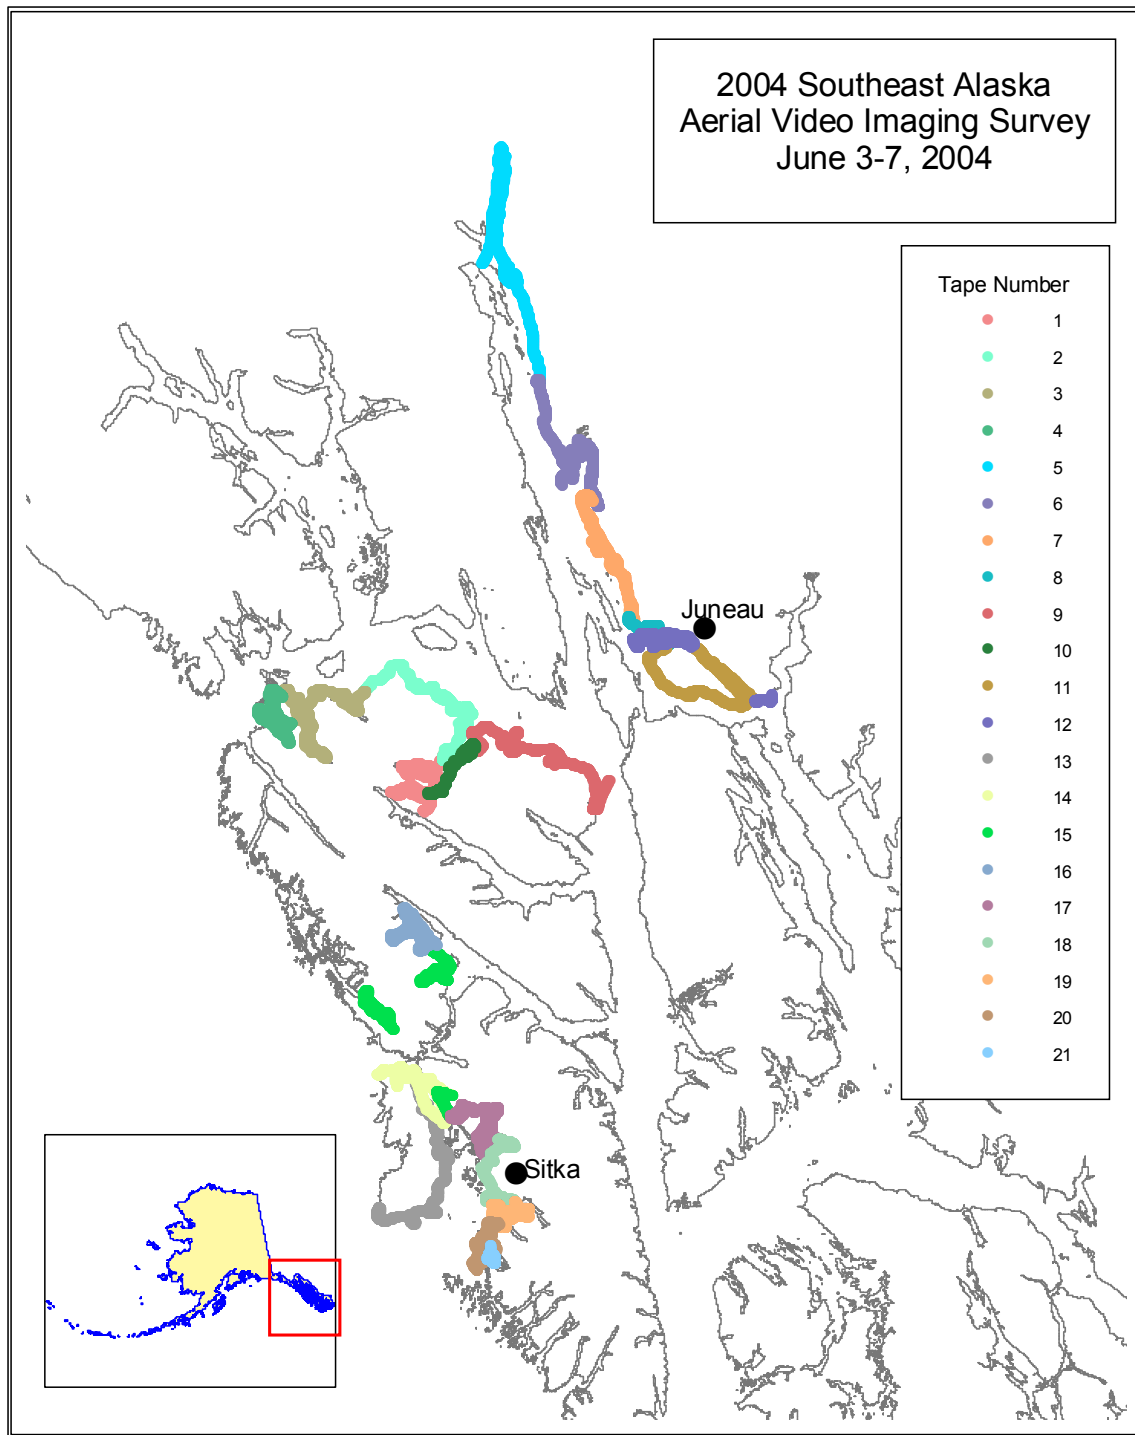

Figure 1. Location of individual tapes from the 2004 Southeast Alaska AVI Survey

This survey combines the use of digital video camera technology with real-time GPS mapping to image the shoreline of three areas in southeast Alaska: Icy Strait, Lynn Canal, and Sitka, at low tide. The unusual features of the survey are: (a) the survey was conducted during the lowest tides of the year so the entire intertidal zone is imaged; (b) the technique is not weather dependent so imagery can be collected in any conditions under which aircraft can fly and; (c) both a coastal ecologist and coastal geomorphologist were in the aircraft providing real-time commentary on intertidal features that may not be visible on the imagery.

The survey was conducted by Coastal & Ocean Resources, Inc. (CORI), of Sidney, BC under contract to the NOAA and National Marine Fisheries Services, located in Juneau Alaska.

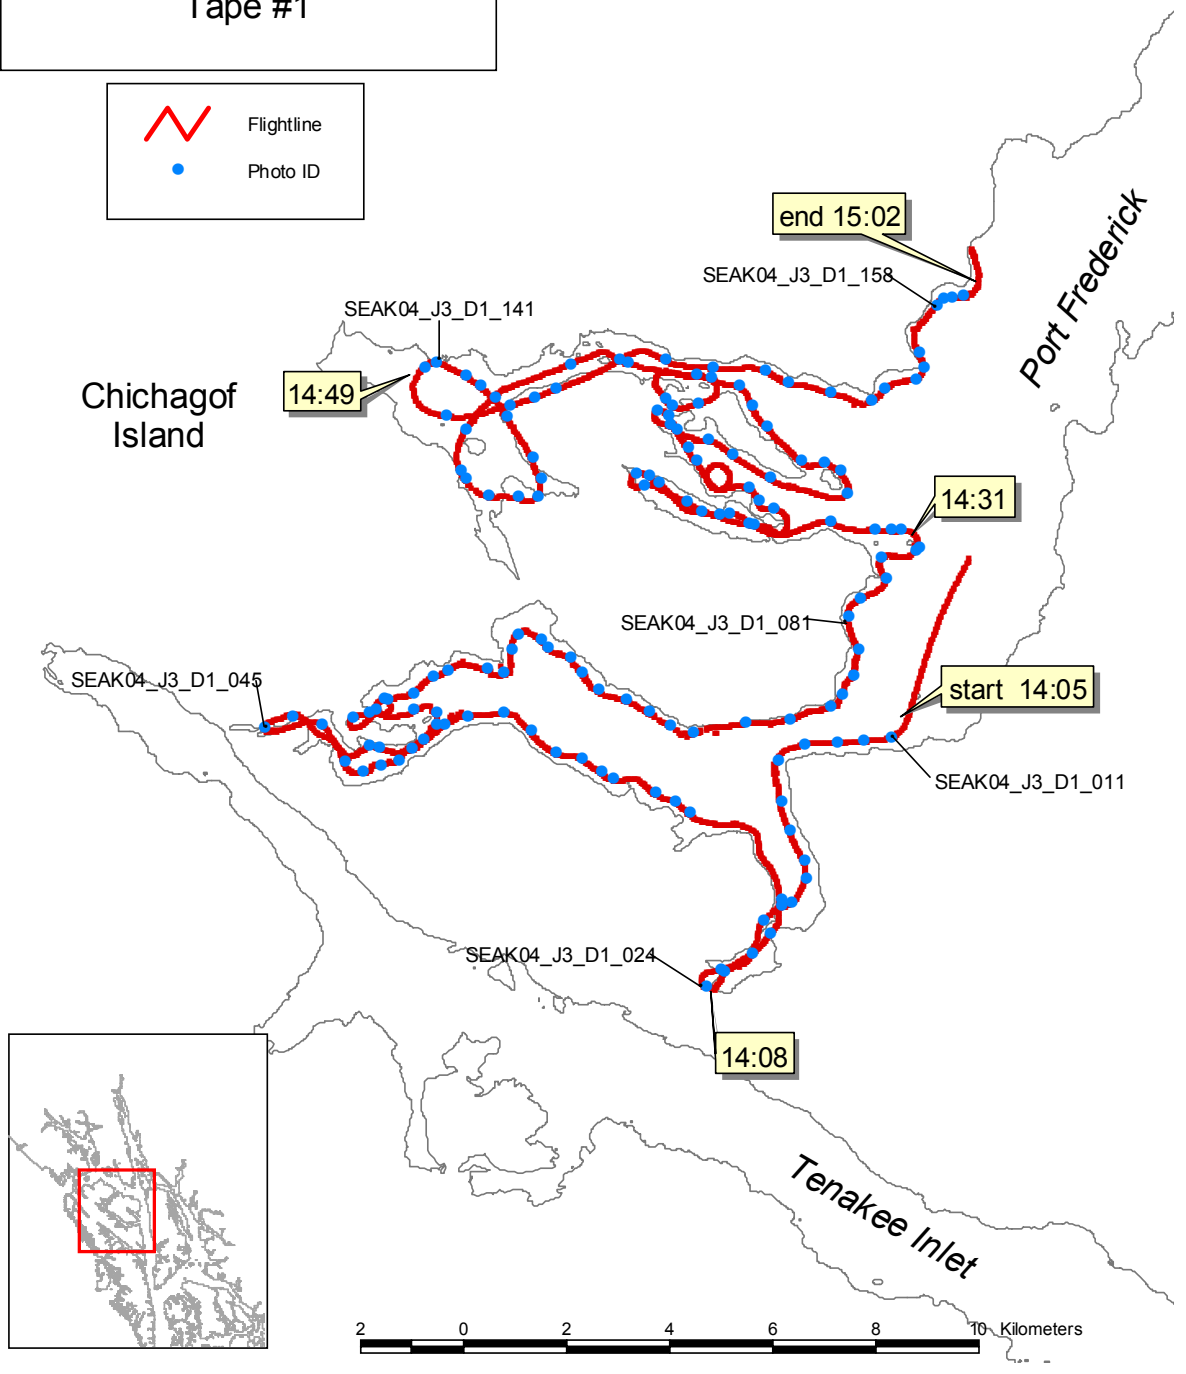

Figure 1 shows the overall flight coverage by tape number. The flight crew names and responsibilities are summarized in Table 1.

**Table 1 Southeast Alaska AVI Flight Personnel and Responsibilities,**

<b>Function</b>	<b>Individual/ Affiliation</b>	<b>Responsibilities</b>
<i>geomorphologist project leader</i>	John Harper CORI	co-ordination of survey, video imaging, geomorphology commentary, project reporting
<i>coastal ecologist</i>	Mary Morris, Archipelago Marine Resources Mandy Lindeberg, Auke Bay Marine Lab	biology commentary, digital photographs
<i>navigator</i>	Sheri Ward CORI Zach Ferdana The Nature Conservancy	in flight navigation & recording, post-flight track plotting
<i>pilot</i>	Lewis Hart, Coastal Helicopters
